CUBIC SAFETYRAIL

Cubic SafetyRail protects your equipment and employees from costly accidents caused by lift trucks and other in-plant vehicles. Professionally engineered to provide maximum protection for people, machinery, building walls, shelving, conveyors, racks, finished product, raw material supplies, loading docks and more.

Tested and proven to withstand the impact of a 10,000 lb. forklift moving at 5 mph. Tests were monitored by an independent testing agency. Results available upon request.

Pre-punched columns simplify installation, accommodate straight railing runs and runs with inside or outside corners. Columns are high tensile 5" x 5" x 3/16" steel tube with 3/4" x 10" x 10" welded baseplates.

Exclusive, patent pending Quik-Connect™ rail hanger saves time and allows for quick removal of rail sections – no tools required. Quik-Connect also makes it easy to add rail sections or dismantle railing for relocation.

Single rails (16" high) or double rails (42" high) can be mixed and matched to fit any application. Lower rail is 2" clear of floor to provide backstop for pallet storage.

RACKGUARDS

Cubic RackGuards feature a triangulated design with heavy-duty construction to deflect impact and prevent damage to rack system uprights.

Absorbs the impact of a forklift or other moving vehicle – protects your investment by taking the beating instead of your rack system uprights.

Constructed of steel and equipped with factory welded base plates that bolt directly to your facility floor. Offered in two sizes (12" & 24" heights).

Available for installation around rack uprights with standard footplates or seismic footplates.

TRACKGUARDS

Heavy-duty structural steel Cubic TrackGuards protect overhead door tracks. Designed to absorb the impact of a forklift or other in-plant vehicle.

Prevent damage to door tracks and door operation problems and save overhead door repair costs.

Standard 36" and 48" height provides front and side protection without interfering with door operation.

Wrap-around design quickly bolts to building floor for easy installation. Optional wall mount design and custom heights available upon request. Easy to replace if damaged by a forklift.

Guard compressors, water mains, gas pumps, electrical boxes. Protect robotic equipment, mezzanines, racks, building walls, support columns, in-plant offices, conveyor runs and more.

Protected with an attractive, durable, powder coat finish. Choose from 14 colors. Standard yellow ships within 48 hours. Custom colors and finishes also available to meet your needs.

HANDRAIL

Cubic HandRail is easy to install and clearly defines pedestrian walkways, loading docks, production areas, assembly lines and more.

Ideal for in-plant offices, work platforms, balconies, stairs, equipment crossovers, catwalks & mezzanines.

Patented intermediate railing connection is easy to install and allows for quick expansion of your handrail system.

Square tubing design is stronger and easier to clean than pipe fitting designs. Continuous top rail provides visually attractive, finished appearance.

Professionally engineered to meet all building codes including uniform and point load requirements.

Double or triple level handrail systems are offered. Custom designs also available.

CODE APPROVED STAIRWAYS

Cubic Stairways are professionally engineered to meet IBC, UBC and OSHA requirements. Custom configurations and sizes are also available.

Ideal for indoor or outdoor applications including mezzanines, loading docks, work platforms, conveyor crossovers, fire exits, construction trailers, storage trailers, in-plant offices and elevated work areas.

Options include code-approved handrail, stair platforms, closed risers and handrail extensions.

Constructed from heavy gauge steel. Offered with solid diamond treads.

One-piece stringer and handrail assemblies improve rigidity and ease of installation.

All stairways are premanufactured and shipped knocked down. All components and hardware included.

SAFETYGATES

Cubic SafetyGates feature a floor-mounted design ideal for use on mezzanines, in-plant office platforms, catwalks, elevated storage areas and more.

Available with 6' and 8' openings.

Professionally engineered to meet all building codes. Unique features address total safety and operational efficiency.

SAFETYBOLLARDS

Cubic SafetyBollards guard valuable plant equipment, loading dock areas, parking areas, building passageways, water mains and more.

Extremely durable, structural steel design with easy bolt to floor installation.

Bollards are high tensile 5" x 5" x 3/16" steel tube with 3/4" x 10" x 10" welded baseplates.

Available in heights of 17" and 43".

AISLEGUARDS

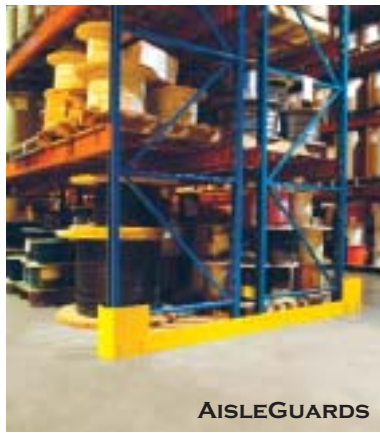

Cubic AisleGuards protect rack corners and aisles - a practical and economical solution for warehouse and distribution centers.

Prevent lift trucks from damaging valuable merchandise and products stored on rack systems.

Bolted connections simplify installation. Damaged components are easily replaceable.

AisleGuards are constructed of heavy-duty steel angles. Corners are 1/2" x 12" formed steel plate.

Available in 3 sizes (36", 42" and 48") to accommodate various rack depths.

LADDERS & CAGES

Cubic Ladders & Cages are designed to be used anywhere that safe vertical climbing and landing access are required.

OSHA compliant, quality construction shipped ready for installation.

Optional safety cages available when requested. NOTE: Cages are required at heights over 20 feet.

Ladders can be shipped as subassemblies for ease of handling and freight savings.

Cubic also offers ships ladders which are designed for a more comfortable incline (60° slope). NOTE: Ships Ladders do not meet typical building egress requirements.
