NEW CUBIC AISLEGUARDS PROTECT RACK CORNERS AND AISLES

New Berlin, WI . . . Cubic Designs is currently introducing "Cubic Aisle Guards" a heavy-duty steel guard system that protects rack system corners and aisles. The Cubic Aisle Guard system is a practical and economical solution for manufacturing plants, facilities, warehouses and distribution centers that utilize rack systems for product storage, bulk materials or merchandise.

Cubic Aisle Guards prevent damage to valuable materials and merchandise and protect rack uprights by absorbing the impact of a forklift, sweeper or other in-plant vehicle. In addition to durable, all-

steel construction, Aisle Guard components also offer bolted connections for easy installation and adjustability. Floor rails bolt directly to a facility floor. The system is modular and designed for expandability. Individual components are easily replaceable should damage occur. Cubic Aisle Guard floor rails are constructed of heavy-duty steel angles and available in 3 sizes (36", 42" and 48") to accommodate various rack depths. Corner guard components are 1/2" x 12" formed steel plate.

Cubic Aisle Guards are protected with an attractive, durable, powder coat finish available in 14 colors. Standard yellow is offered for immediate shipment (within 48 hours or less after approved order). Custom colors and finishes also available upon request.

Cubic Designs, Inc manufactures a full line of industrial safety products designed to provide total plant protection. The company offers heavy-duty Safety Rail, Rack Guards, Track Guards, Handrail Systems, Safety Gates, Bollards, Rack Aisle Guards, Ladders & Cages and Code Approved Stairways.
